

TRICS T10

Pack-COM wireless team communication system

Elevated efficiency in tactical environments

REDEFINING WIRELESS VERSATILITY AND SECURITY

A powerful wireless communication solution that enhances operational performance while creating a completely secure, heavily encrypted communication bubble for your teams. Designed to seamlessly integrate with existing radio infrastructure, minimizing the need for costly overhauls. The system supports robust full-duplex communication with unmatched security, clarity, versatility, and reliability in even the most demanding conditions.

SYSTEM OVERVIEW

System devices	System contains minimum of two devices. One base station model and one client model.
Number of users	1-10 clients & 1 base station
Number of radios	Up to 2 personal radios/device/user

TECHNICAL INFORMATION

Range	400m LOS (in optimal conditions)
Operational Temperature	-35°C - +60°C
Ingress protection	IP68
Operation time	+30 h
Communication delay	Less than 50ms
Changeable battery capacity	2600mAh
Access type	Full-Duplex with VOX or PTT mode
Menu type	Voice prompted, button controlled
Encryption	AES-256
